$10.00 REWARD

for information leading to recovery of a Black 3 year old mare supposed to be in foal, weight about 1000 lbs. Has white left hind foot to Pastern joint, white J in forehead, wire cut on left side of neck and in front of both hocks, Brand invisible last seen near Neutral Hills school house. W. Chave c-o W. H. Poynter Please Notify 21 tf, u.p

Mr. V. S. Kay of Kirriemuir took charge of the services in St. Laurence Church last Sunday. The anthem "Sweet is Thy Mercy, Lord" was rendered by the choir. Soloist, Mrs J. Hamer.

The local Tennis Club has now completed their organization. The following have been elected to office. J. L. West, President. Miss A. M. Curtis, vice-Pres. Mr. Dickson, Sesretary-Treas. Miss Camerson and Mr. MacKenzie, together with the officers constitute the Executive. Improvements, consisting of the laying out of another court, and the facing of them north and south and south (instead of east and west) has already commenced. About thirty members are expected to join and play, taken all round, this season seems to be a promising one. It is the intention of the Club to stage a Tournament here later in the summer and judging by some of the plays pulled already, Monitor will secure her share of the jewelry. Here hoping.

Now that many of the gardens are in, citizens of Monitor who are the proud possessors of a cow or some chickens, will do well to remember that these gardens where not put in for the benefit of the said cows and chickens. Take your cow out on the prairie and stake her out Keep your chickens shut up and give someone a chance to raise a few vegetables. We are not all lucky enough to have a fence around our lots Much ill-feeling will be saved if this matter is kept in mind. "Do unto others as ye would they shoud do unto you" is a good proverb to live up to these days Try it, and see what a lot of satisfaction you will reap. Selah

The Seed's for the local school Fair have arrived and the various schools can secure their supply on application to the secretary.

The Ladies Aid will meet at the home of Mrs H. Woodrow on Wednesday next the 19th.

Citizens will do well to remember that School Taxes must be paid before July 1st. On that date a penalty will be added to all taxes that are in arrears. The district is badly in need of funds, and the Board of Trustees urge that all taxes be paid without delay.

How To Figure Income Tax

Harken to the wail of this tax payer who lives in Glendale, and has an easy way to figure taxes, and says this simple formula, if followed will produce results: "There need be little trouble to figure income tax. In the first place it may be worked out by algebra, astronomy, trigonometry or syntax, and then your answer may be correct or it may not. If your income is $2,400 a year and you have a child in your family, you substract $200 from your income, add the amount of your personal property, multiply by your waist measure, substract the size of your collar and your childs age, multiply by the amount you have given the church during the year and divide by the number of your automobile licence ta7. If there is a second child deduct $400 from your income and add the weight and age of the child divide by the date of your birth multiply by the size of your hat and substract the weight of your mother-in-law. After you get it all figured out, you wont be able to pay any name or nature, for they will have you in the booby hatch and strapped down.

Fascinated, and with bated breath we were held speechless (naturally) to the ground. Recovering from the shock somewhat, we advanced with exceeding care over the dangerous ground. We could scarce believe our eyes, Here, right in front of us, something wonderful had happened or we missed our guess. "Yes" "No" "Ah" and such like exclamations escaped us. Finally, with a shriek of delight that echoed in the voluptuous and velvety heavens, truth dawned on us (it always does that way) Our first radish had arrove. Yea, verily.

Dictographed on the Main Esplanade. D. S. W. "Can I get a hair-cut without taking my coat off?" F. M. T. "Sure, keep your hat on too if you want to"

R. M. OF STEWART NOTICES

The Herd Law for this district has been extend untill May 25th. There will be open range till that date.

The second shipment of Gopher Poison is expected to arrive on or about the 20th of May, and it will then bedistributed to the farmers. It is to be hoped that all will call for their poison on that date, and make an effort to have it distributed, Poison will be supplied for vacant lands adjoining.

Treherne Times Replies To Mr. Wright

Our readers will doubtless remember that we published an article referring to the pastime of dancing some time ago in the "News"

The "Treherne Times" copied our article, with the argument submitted by Mr. Wright in the following issue of that paper, with the following remarks in conclusion:

The Times Editor hopes that, if the present issue of the obscure little sheet printed "somewhere in Manitoba" should chance to fall into the hands of the said Mr. Wright, he will explain to its editor and its readers why it is, since the Methodist AND other church doctrins do not oppose dancing its [and their] ministers, pastors or rectors so often do. Perhaps if ministers confined their efforts more closely to the doctrins of their churches and did not take quite so much gunpowder from Billy Sunday's barrel, it would not be quite such a hard matter to interest the young folks in the church and greater good might result.

The editor does not refer particularly to any church or denomination but to the average Protestant church of to-day.

NOTICE

Will all teachers that have any seeds left over from those recently sent out in connection with the School Fair to be held in Monitor, please return them to H A Warner at Monitor.

Construction has been commenced on the splendid new Garage for Mr. C. B. Horsch on Railway avenue. Mr. Roy Cramer has charge of the work

We regret to report that Miss Curtis was taken sick on Wednesday morning last, while on her way to school, It is feared that she has contracted measles, although nothing definate is at present known. The School Board are endeavoring to engage a temporary teacher to take charge of Miss Curtis's room during her absence.

Local Happenings

Practically 90 per cent of the wheat has been sown in this district at date. As far as we can ascertain, this sets another record for Monitor. With anything like decent weather Monitor will surely come into her own this fall. What with a bumper crop of wheat, and several crops of oil, such a wave of prosperity will hit thie district that will break another record. Yea, verily, and many arrears of subscriptions will but thats another story.

The local Board of Trade should be asked to have the C. P. R. move the depot down by the Stock Yards, as the passenger coach always stops there for about 30 minutes before pulling into the depot, with the result that the passengers alight there and walk the rest of the way in We understand that Bob Fawcett will in future meet the west-bound train with his jitney and thereby reap many shekels He could also possibly bring up the mail bags and then the passengers goings west could receive their mail before the train pulled out (maybe)

A. Grace, our worthy butcher has traded some of his town property for a real, genuine, dyed-in-the-wool Lizzie. The deal was made through the local agent, Mr. C. B. Horsch.

Since the above was written we learn that Mr. Grace has bought the car direct from Mr. Horsch, and retains his property that was traded.

This district was subject to a few spasmodic rain showers on Monday of this week. Only a little rain fell—but every little hepls.

Mrs. J. Bergman returned to town on Saturday last after an extended visit at points east.

Mr. Wm. Stork returned to Monitor from the States last Friday.

Mrs. Elness is in town and will reside at the home of Mrs. Woodrow.

Messrs Dickson and Chas. Yee had a narrow escape from a fatal accident last week when the car in which they were riding, being driven by Chas. Yee turned turle. It appears that Charlie rather fancied himself as an aeronaut, and wanted to show Dickie how to fly over the creek. As a result the car turned over, Dickie received a good shaking up, and Charlie was pinned to the ground by the ear. No bones were broken. To date we have not been able to discover the brand, or where they got it.

BORN To Mr. and Mrs. E. Crofts at Monitor on May 4th a daughter.

The boundaries of the Moni- School District No 3056 have been altered by the addition of the following lands' namely Sections 3. 10. 14. 15, west halves of 2 and 11 and the south half of section 23 in Township 35 Range 5 west of the fourth.

ROYAL
YEAST CAKES

Royal Yeast has been the standard yeast in Canada for over 50 years, and it is a well known fact that bread made with Royal Yeast possesses a greater amount of nourishment than that made with any other.

Clean Up!

Around about this time of the year it is customary for the housewife to indulge in her annual spring housecleaning. It has become the usual procedure, too, for the provincial and municipal fire prevention and health authorities to declare "Clean-up" days or weeks. The object is, of course, to focus public attention upon the importance of organized community as well as individual effort being devoted to the task of collecting and destroying the refuse and rubbish which always accumulates around the house and other buildings during the severe winter months.

It is important that this work be attended to for many reason. First, there is the question of health to be considered. The accumulation of dirt, filth and waste material of various kinds develop from such accumulations, but flies, the greatest of all carriers of disease, find their chief breeding places in filth and rubbish. A general spring clean-up is one of the best health measures that can be taken in any home or community.

The removal of the dust and dirt resulting from the sealing up of houses and offices during the cold winter months is also a protective measure from moths and insects whose destructive activities are too well known to even require mention.

A general spring clean-up is important also from the standpoint of fire protection. Many people who exercise care in regard to the accumulation of filth and rubbish which might have an adverse effect on health, and as the breeding places of germs and insects of many kinds, neglect to collect and remove other kinds of rubbish which, while not dangerous from these standpoints, are the cause of fires which, all too frequently, result in serious conflagrations with consequent loss of valuable property and even more valuable lives.

"Clean-up" days or weeks have become established institutions in the cities and larger towns, and the municipal authorities co-operate with the individual citizen in city-wide and town-wide house-cleaning. The public health is thereby promoted, a larger measure of security from fire is provided, and the whole community made much neater and more attractive, leading inevitably to greater civic pride and to the carrying out of other improvements, such as painting, laying out lawns and gardens, and general home and civic betterment.

Although such organized co-operative effort is not possible in the rural portions of the West, it is none the less important that the same work should be carried out on every farmstead, and the united efforts of all members of the family and the hired help directed to a general farm clean-up, not only around the home but all the outbuilding. The removal of accumulated rubbish will not only improve the appearance of the place, but it may easily be the direct cause of preventing sickness and loss by fire.

Canada's fire loss annually is simply stupendous; it is the highest per capita of any country in the world. It amounts, on an average, to over $25,00,000 a year, or at the rate of $68,000 a day. According to statistics compiled by the National Board of Fire Underwriters, 62 percent of all fires start from preventable causes, while fires of unknown origin are, it is believed, also largely from preventable causes. This heavy fire loss forces insurance companies to charge extremely heavy premiums for fire insurance, thus those innocent people who take all possible precautions are made to suffer loss because of the carelessness of others.

Addressing a recent meeting of the Canadian National Safety League, one speaker declared that experience has shown that cleanliness about any institution would do more to prevent fires than any other one thing. The "rubbish habit," he declared, was a source of constant danger.

Safety First; an ounce of prevention is worth a pound of cure; it is better to be sure than sorry—all of these old adages and scores of others of like import apply to the question of a general spring clean-up and the removal of rubbish and waste of every description. Better still, of course, is never to allow it to accumulate, but under certain conditions this is not wholly possible during the winter. There should, however, in their own individual and even selfish interests be a general response by all people to the proclamations issued by the provincial governments of the West for "Clean-up" week. It is not necessary to wait until that date, but individual and community housecleaning should not be deferred beyond it.

A SMILE IN EVERY DOSE OF BABY'S OWN TABLETS

Baby's Own Tablets are a regular joy giver to the little ones — they never fail to make the cross baby happy. When baby is cross and fretful the mother may be sure something is the matter for it is not baby's nature to be cross unless he is ailing. Mothers, if your baby is cross; if he cries a great deal and needs your constant attention day and night, give him a dose of Baby's Own Tablets. They are a mild but thorough laxative, which will quickly regulate the bowels and stomach and thus relieve constipation and indigestion, colds and simple fevers and make baby happy — there surely is a smile in every dose of the Tablets. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Saskatchewan Sells Bonds

The Saskatchewan government has just effected a sale of one million dollars of four year six percent Saskatchewan bonds at 102.20, or a net cost to the province at the rate of 5.37 percent, it was announced by the Hon. Charles A. Dunning, provincial treasurer.

Conscience Money

The Chancellor of the Exchequer of the United Kingdom publicly acknowledges the receipt of fifty pounds conscience money from S.O.S. It is a big amount in the circumstances, but doubtless is as a grain of sand on the beach to what is owed the government by individuals whose consciences do not worry them, at least to the extent of compelling a disgorgement. S. O. S. is a lonely fellow. Or is it a she?—Montreal Gazette.

HEART SO BAD WAS NOT SAFE TO LEAVE HER ALONE

Miss Eva P. Yateman, Krugersdorf, Ont., writes: — "I feel that I must write and tell you of the benefit I have received from Milburn's Heart and Nerve Pills. About four years ago I was taken terribly bad with my heart, nerves and fainting spells, and was down in bed for about six months. I doctored with two different doctors and seemed to get better, although the fainting spells would not leave me. I would take such terrible falls, wherever I was, that it was not safe to leave me at home at any time. At last I decided to resort to proprietary medicines and took several different kinds, but seemed to receive but little benefit from them. One day noticing the advertisement of Milburn's Heart and Nerve Pills I decided to try them, and before I had taken more than two boxes I could see they were helping me. I have taken about ten boxes, and am almost cured of those terrible spells. I sincerely feel that your medicine has proved a blessing to me, and I advise any one troubled with their heart to try them, as I am confident they will find relief."

Milburn's Heart and Nerve Pills are 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Parasites as Exterminators

Development of internal parasites, which will ultimately exterminate the grasshopper, is being carried on at the University of Saskatchewan by Dr. A. E. Cameron, Dominion entomologist. The scientist says that ordinary methods must again be used this year, but hopes that development of the parasite will be sufficient in 1921 to prevent any further grasshopper plague.

Minard's Liniment, Lumberman's Friend.

Care of the Battery

Why Distilled Water is Always Used For Batteries

A good deal of ignorance is abroad as to why nothing but distilled water should be used in storage cells, says the Motor Annual of Popular Science Monthly. All but distilled water contains mineral matter in solution, and although this may be small in quantity, as the water evaporates the mineral matter is left behind and all that ever enters the cell remains there. It is obvious, therefore, that the amount of mineral matter in solution is constantly increasing. Very soon the concentration becomes so great that mineral salts are deposited on the plates of the cells. Electrolytic action then begins between the salts and the plates, the framework of the plates is eaten away and the life of the cell destroyed. The energy wasted in the process, too, is considerable.

Some people have the idea that boiling water helps, but boiled water is worse than unboiled, for the concentration of mineral matter in solution is only increased. Therefore, avoid the use of any but pure distilled water in filling storage cells.

Storage for Coal

Sheds with a storage capacity of 10,000 tons, to be extended to handle 20,000 tons, have been secured in Winnipeg to store coal shipped from Drumheller, Alta. This is the first time coal from the Drumheller mines has been stored in that city.

Binding Power of The British Throne

It is Because of the Republic Spirit That British Monarchy Stands Firmly

Western Australia Mail.—The British Empire, or, as it is of late more correctly being styled, the British Commonwealth of Nations, could not well exist without the nexus of a common throne. This crowned republic, if it is to continue as a political entity cannot conceivably scrap the institution of the monarchy, which is the axis round which all our governmental machinery so smoothly revolves. The sovereign people are not more sovereign anywhere than in Britain and in the self-governing Dominions The American president may, and does on occasions, exercise an autocratic power which no occupant of the British throne could or would attempt and it is because of the republic spirit which pervades British political institutions that the British monarchy stands so firmly as it does. A paradox this no doubt, but a paradox which exactly expresses the truth.

Ask for Minard's and take no other.

Sheep Ranchers For B. C.

The owners of an area totalling 160,000 acres in the Cotsa Francois and Stuart Lakes districts in B. C., have sold out to a party of 12 prairie farmers who will run sheep there. A Manitoba rancher has bought 3,200 acres near Stuart Lake and taken an option on 5,000 additional acres, while a Victoria resident recently bought 2,040 acres on the Necosle river in the same section. An influx of Swiss farmers is expected into the province, with a view to settlement, being graduates of the agricultural college at Zurich. They are mainly interested in the dairy business.

RHEUMATISM

This is just the season when Rheumatism with its grinding pain and stiffening of joints gets hold of you. Fight it with

Templeton's Rheumatic Capsules

Only One Way In Which to Remedy the Teacher Shortage

According to exSecretary Lane, of the Interior Department, last year in this country 143,000 public school teachers resigned their places. In Mr. Lane's words, the public school, the "greatest bulwark against the spread of Bolshevism," is crumbling. The cause lies in the fact that teachers' salaries have not kept pace with the increased cost of living.

We cannot blame teachers for leaving their places. Their ability to procure the necessities of life at prevailing prices depends on getting a job paying considerably more than they can hope to get by sticking to schoolteaching.

And this is not the worst. To the nature of things, as Mr. Lane adds, it is the ablest and most versatile of the teachers who have gone out from the schools.

So far 1920 has only accentuated the history of 1919. In Philadelphia, for instance, the situation is so bad, that in its public schools nearly 100 substitute teachers are needed; more than 5,000 children have been forced either to leave school or to receive only part-time instruction. In St. Louis about 100 teachers have resigned to enter commercial life and in Memphis certainly an equal number. In New Orleans the teachers received a 30 percent salary increase in February, and their resignations have fallen off. The same is true of San Francisco.

In the autumn of 1919 and the winter of 1920 in New York city, over a thousand teachers resigned. By the end of February some 3,000 classes were teacherless and 118,000 children were sent home. In the attempt to remedy the teacher shortage in both state and city, the Public Education Association appointed an influential committee of 100 eminent citizens to urge the passage of appropriate legislation. Two salary increase bills are before the legislature at Albany; one of them would increase the higher grade teachers about 20 percent, and the lower grade about 40 percent. The other would provide not percentages but flat increases for all teachers. The minimum salary in the first bill would be $1,400, and in the second $1,600. The Public Education Association is supporting the second bill.—New York Outlook.

Power Resources Of British Columbia

One of the Greatest Industrial Assets This Province Contains

The water power wealth of British Columbia, it is said, equal to five Niagaras, is one of the greatest industrial assets this province contains. Pouring down from the mountains and from the glaciers that fill the gorges of the northern ranges, comes enough water every day to develop electrical power equivalent to three million of horse-power. This figure is not based on flood conditions, but is the estimate arrived at by government engineers working during low water seasons and using a conservative basis of estimate. The mighty falls of Niagara, when all the water that is available on the Canadian side has been harnessed to the turbine will produce only 650,000 horsepower. British Columbia's mighty rivers and mountain torrents, if they are harnessed, could supply its homes and industries with nearly five times as much power.

When it is remembered that only 123,000 electric horsepower can be developed by the plants which are at present supplying Vancouver, New Westminster and all the towns of British Columbia in the vicinity with power which drives the motors in the mills and factories, propels the street cars along the city streets and far out into the country, provides lights for the city's streets and homes, and the heat for the up-to-date kitchens, it will be easily understood that the total water power available in the province is sufficient to provide, power, light and heat for 40 cities and industrial centres of the size of Greater Vancouver and New Westminster all combined. British Columbia possesses in the liquid wealth that pours down from the hill the equivalent to five Niagaras, with all that this means for the future of the province industrially when these waters are harnessed and turned to the needs of men.

Exchange and Production

Accurate Barometer Of International Trade Situation

The fluctuating rate of exchange, inconvenient as it may be, is on the whole, an accurate barometer of the international trade situation.

A dollar bill is only a promise to pay and is valueless unless redeemable. Gold, however, is not the only commodity with which it can be honored. It can be redeemed with wheat, pulp, paper, lumber, fish, coal, anything at all of which the country is using the note produces a surplus for export. The way to right adverse exchange is to speed up production, so that we can pay for all the goods imported with other goods exported. Retrenchment, that is, cutting down expenditures on unnecessary articles of luxury, will help.

Auto and Highways

Motor Car is Now Classed As An "Economy"

One combination which is showing real team work in slashing at the high cost of living is the automobile and the improved condition of highways. Years ago an automobile was purely a luxury, later it became a necessity, and now it is a real economy. By means of it the city dweller is enabled to live outside of the high rent districts without sacrificing valuable business hours.

Furthermore, he can now live where he can raise his own garden and laugh at the soaring prices of food products. Recreation and clean, pure, health-giving air are provided for himself and the whole family.

The farmer who formerly had to plan his trips to town in order not to interrupt his scheduled work, can now run into town on a minute's notice to get needed supplies or for a bit of recreation. Instead of being hours from town he is now but a few minutes. It is just as good as moving closer.

In order that it be a real economy of course, the motor car must also be economically operated, and heretofore owners have been forced to decide between economy and luxury in choosing a motor car.

To Explore Hinterland

Exploration Party Starts on A Long Tour of Far North

Further exploration of Canada's far north will be undertaken this summer by a Dominion government expedition which left Winnipeg yesterday under the leadership of F. H. Kitto, of the natural resources intelligence branch, department of the interior, Ottawa.

It was estimated that the party will travel roughly 4,000 miles from Winnipeg and return, following the various waterways northward to the divide between the Mackenzie and Yukon basins, via the Porcupine River to Yukon and Dawson City and thence down to Vancouver. Mr. Kitto will make a side trip into the buffalo country at Fort Fitzgerald to report on conditions there. He will also report on the most northerly road in Canada, a vehicular road 16 miles in length, which the Dominion and Alberta governments are building jointly, from Fort Fitzgerald to Fort Smith. It follows a trail which has been in use for hundreds of years, having been travelled in 1778 by the discoverer of the Makenzie River. Another official purpose of his visit will be to look into mining properties at Stewart Lake. He expects to return to Winnipeg in September. —Free Press.

Isinglass contains from 86 to 93 percent gelatine.

Gardening For Schools

School Garden A Big Classroom For Outdoor Instruction

Gardening is systematically carried on by the public schools of many Canadian cities as part of the educational course. Dr. J. H. Putman, senior inspector for Ottawa public schools, in the March number of the Agricultural Gazette published by the department of agriculture at Ottawa, describes the system under which this work is done in the Capital City.

The school garden is referred to as a big class room for outdoor instruction in plants and plant life. It has many of the possibilities in miniature of an experimental farm. It has to do with the composition and fertlity of soils, with drainage, with seed germination and with insect enemies of plant life. It shows in a way that cannot be questioned the effect upon plants of too much or too little sunshine or moisture and the bad effects of weeds and the necessity of giving a plant plenty of room if we wish to secure a high state of development. Dr. Putman points out that these things would mean nothing to city children if recited from books or told by teachers. These things taught through a garden where the children prepare the soil, sow the seeds, and care for the plants cannot be without good results.

In addition to a central garden of one acre the Ottawa plan involves the organization of home garden clubs, each representing a school. In the three years, 1917-18 and 1919, about 1,000 pupils from second and third book classes received gardening instruction. The school board paid $40 to each teacher who managed a club garden. Every pupil member was required to keep an accurate record of planting, cultivating and other activities. The aim is to grow everything possible from seed. Cold frames are found to be a valuable addition to the equipment. In the central garden, instead of giving pupils very small individual plots, a plot 22 by 43 feet for vegetables and 16 by 20 feet for flowers is given to each class. This garden is having a permanent perennial border established which will give a succession of bloom as well as an opportunity to show the children what they may have in their own home garden.

The Farm and the City

Farm System Must be Brought to A State of Efficiency

During the past month there has been an abnormal number of auction sales in the country. In most cases the reason given for disposing of livestock is the lack and high price of labor. The procession from the farm to the city continues, and it looks as though prices of produce will go still higher or the quantity will decrease, for apparently the returns from farming are not as attractive as those offered by the shops in the cities. The farmer is absolutely necessary to the city and either city wages must come down or farm prices go up. The farm laborers are justified in refusing to work from dawn till dark for wages below that paid in the cities, and the farmer finds himself hard put to get help. The farm business must be made to pay enough so that for the same number of hours wages on a par with the cities can be paid. Farm system efficiency must be on a par with the factories or unequal conditions will cause serious complications which will affect the whole of Canada. The day has passed when a farmer could keep his sons on the farm and work them as hired men without pay.—From the Huntingdon, Que., Gleaner.

Grazing Grounds for Reindeer

As a result of the recommendations made to the government by the commission headed by Dr. J. G. Rutherford, an order has been passed setting aside three islands in the Northwest territories as grazing grounds for muskox and reindeer. The three islands named, Southampton, Mansel and Goat's, are all favorably situated with plenty of food and suitable climatic conditions.

Instead of sending a friend on a fool's errand go yourself.

War-Stricken Europe Slowly Recovering from The Shock of War

"The gaping wounds of Europe are gradually healing and the San Remo conference marks a distinct stage in its convalescence," said Premier Lloyd George in closing his speech in the house of commons, detailing the results of what he described as "the most remarkable conference in every respect held since the armistice."

The premier's statement was most optimistic, setting forth the claim that the conference had removed all misunderstanding between France and England, and that the allies were in complete agreement not only to enforce the treaty, especially the disarmament clauses, but against any French annexation of German territory.

"For," added the premier, "we cannot have another Alsace-Lorraine." Mr. Lloyd George further indicated that if Germany brought definite proposals to the Spa conference concerning the amount of indemnity she was able and willing to pay, she would be treated with consideration. The premier dealt mainly with Germany. He referred to the German government's difficulties in getting its decrees obeyed and emphasized that the Germans were "a broken-backed people" whose actions were convulsive.

"We have information from British officers," he continued, "that there is famine in the land and that many people get only a third of needful food." He expressed the conviction that the people of neither Germany nor France wanted militarism. Dealing with the Turkish treaty he added little to what is already known from M. Millerand's speech, and declared that neither Great Britain, France or Italy was able to undertake the mandate for Armenia because that would have involved heavy military resources for a great conquest, if the Armenians were to have anything more than a "paper Armenia."

The premier confirmed that the British mandate would include Mosules and that the conference had reaffirmed its decision to open trade relations with Russia.

If the U. S. found it impossible to undertake the responsibility of Armenia the whole position, the premier said, would require reconsideration, and England would have to take a share in helping the Armenians to equip themselves for their difficult and perilous task.

Great Wealth of Northern Manitoba

Action To Be Taken in the Development of Large Pulp Resources

Prof. R. C. Wallace, commissioner of Northern Manitoba, says that comprehensive development in mining, lumbering and pulpwood manufacture are under way in Northern Manitoba, and the big changes are expected to the made during the summer.

The Pas Lumber Company, a $1,000,000 concern, has started several logging camps in the Carrot River district, and the mill at the Pas is being enlarged to meet requirements. The logs, while cut in Saskatchewan territory, are floated down to the Pas for manufacture into lumber.

Action is also expected to be taken in the development of the large pulp resources. An Ottawa syndicate has held concessions here for some time. Camps will probably be established, and water power projects located during the presnt year. As to mining operations, the commissioner spoke of the development work planned by the Flin Flon syndicate. Large numbers of prospectors are preparing to go into the mineral area as soon as conditions permit travel.

A Profitable Exchange

Iowa Farmer Secures Land in Saskatchewan Without Any Expense

Owing to the exchange rate between Canada and the United States, an American farmer recently purchased a farm near Prince Alberta, which cost him absolutely nothing; he had sold his farm in Lowa for $300 an acre, and on his arrival here, found that the existing rate of exchange gave him $345 for every $300 he had brought over. In this district he found a farm that pleased him at $45 an acre, and after completing his purchase, had exactly the same amount of money in hand for which he sold his farm in Iowa, and possessing a fine Canadian farm. He has written to his friends in the States, and claims that his experience is liable to induce a great many more mid-western American farmers to take up land in Western Canada.

Iceland Applies for Membership

The independent state of Iceland has applied for membership in the League of Nations. Other applications to be heard at the Rome meeting of the council of the league are from the republic of Georgia, San Marino, and Luxembourg.

What's in A Name

He.—May I call you by your first name?

She.—By your last name, if you wish.—Yale Record.

Leave Erin Alone To Solve Problems

New British Ambassador to U.S. Says Englishmen Have Refused To Quarrel

New York.—Declaring that in this generation there is no quarrel between England and Ireland, Sir Auckland Geddes, new British ambassador to the United States, asserted on his arrival in New York that the Irish in Ireland should be allowed to grapple without outside interference.

Asserting that it takes two to make a quarrel, and that the present generation of Englishmen had steadfastly refused to quarrel with Ireland, he said that when the new home rule bill becomes operative, it will be the duty of all British subjects who are not domiciled in Ireland to stand aside and leave those who live their to solve their problem.

"I venture to add," Sir Auckland continued, "that it will also be helpful if the many in all parts of the world who are not British subjects but are interested in Ireland, likewise stand aside and leave the Irish to grapple with their own political difficulties."

Sir Auckland also referred to the Russian situation, stating that until Russia returns to the cicrle of producing and trading nations, economic conditions of the world and the cost of living cannot be placed on a normal footing anywhere. He added that the United States and Great Britain were in cordial consultation on the question of reopening trade with that country.

The Way To Do It

People Must Avoid Extravagance To Bring Prices Down

Speaking at a luncheon in London, England, given by the British Association of Trade and Technical Journals, Sir Auckland Geddes, formerly president of the British Board of Trade, and now ambassador to the United States, said in part: "Cheap plenty cannot be enjoyed again until the whole world is restocked with goods. . . The government's interest is to get prices down, and it can be relied upon to play its part; but all men and women in this country have a part to play also—to cut down the consumption of goods to the lowest possible level, to avoid all extravagance, and to work their hardest at their job, so that the output of our factories and the efficiency of our commercial, financial and general trading organizations may be brought to the highest level of efficiency of which we are capable."—St. Thomas Times-Journal.

One's first crop of wild oats may be a failure, but that is not a good and sufficient reason for sowing another.

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it.

Miss E. L. Doxey, graduate nurse, of 3220 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief.

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

Zam-Buk

Getting the Young Farmer Interested

Maintaining the Interest of Boys and Girls in Farm Work

Dr. J. H. Grisdale, deputy minister of Agriculture for the Dominion, speaking at the Edmonton Livestock show recently, said:

"Another feature of your show well worthy of remark, is the Boys' and Girls' feeding competition. Getting the young farmer, whether male or female, interested in the livestock of the farm goes far toward making for love of agriculture and for permanency on the land. In the last six or eight years, probably no single feature in connection with agriculture in both Canada and the United States has done more to popularize farming than the large number of animals that have been owned and fed and exhibited by our boys and girls at the fall and spring shows. This, I am sure you will agree with me, is a most desirable state of affairs, and this line of effort I am confident will have satisfactory effects in the way of keeping at least a fair proportion of our farmers' sons and daughters on our farms. Let me urge upon your association the still greater expansion of your efforts in this direction and let me congratulate you upon what you have already done, and the progressive spirit displayed by your adding sheep and swine to the classes this year."

Evolve Stoneless Prune

New Prune is Remarkable For its Utter Lack of A Stone

Since the ostensibly despised but privately relished prune has gained the dignity of high price, it is interesting to note the advent of a particularly luscious species remarkable for its utter lack of a stone. In place of the usual adamantine core, is a tender, unprotected seed, with the look and flavor of an almond kernel, making the whole fruit deliciously edible, according to a story appearing in Popular Mechanics Magazine for May. The development of this curious and valuable food product by a noted horticulturist has naturally extended over a considerable period of years.

Fuel for Prairies

Briquettes to be Made From Saskatchewan Lignite

The contract for the buildings of the lignite utilization board at Bienfait, Sask., has been let to Smith Brothers and Wilson, Regina, at $200,000. Work will begin at once. This plant is for the purpose of producing a briquette from low grade lignite, which the board has already announced will equal Pennsylvania anthracite in heating properties, and can be placed on the market at a lower price than the domestic coals of Alberta. The plant is to be in operation this fall.

Aa is frequently used as a river name in Continental Europe.

A Dyspepsia Cure

M. D. advises: "Persons who suffer from severe indigestion and constipation can cure themselves by taking fifteen to thirty drops of Extract of Roots after each meal and at bedtime. This remedy is known as Mother Seigel's Curative Syrup in the drug trade." Get the genuine. 50c. and $1.00 Bottles.

Use Rammed Earth In Buildings

New Kind of Building Material That Is Cheap And Durable

Compressed earth is now being utilized as a building material in house construction in Great Britain, a recent report says. The cost of an entire house is, roughly, one-tenth of that of a similar structure of brick.

Blocks of suitable earth, rammed and compressed, supply splendid material for the building of houses in rural districts, leaving the bricks and mortar for use in towns where other building materials cannot be obtained.

The estimate for the exterior walls of a six-roomed bungalow which has been erected, if built of brick, was $1,000. Their cost in earth worked out at less than $100 and the work was completed in less than a month by two men.

The walls are eighteen inches thick and seem to be hardening to the consistency of a soft sandstone. Although they have been built for little more than six weeks, they seem already dry enough for the house to be habitable.

The walls are formed of ordinary loam, tightly rammed between boards which are bolted 18 inches apart, until the earth wall is sufficiently hard to permit of their removal. Another course is then erected on top, and so on until the wall has reached the full height desired. A thin exterior layer of cement improves the outside appearance, although this is not essential.

Wooden blocks are inserted in the walls, where it will be necessary to fix window frames and floors. Interior walls, dividing the rooms, are made from two-inch breeze slabs, composed of a mixture of ashes and cement, which gives strength and lightness. The bungalow has plenty of cupboard space and a bathroom.

Owing to the cheapness of construction the bungalow, together with six outbuildings and four and one-half acres of land, can be let at a rental of $2.50 per week.

Our Natural Resources

Their Protection and Conservation A Debt we Owe to Future Canadians

The country which would guard its future must exercise the greatest care in the utilization of natural resources. Prodigality has too often been mistaken for development. The fact that capital comes to a country for profitable investment is not an unmixed benefit, and may mean that greedy eyes are seeking new fields to conquer after home industry has been developed to a standstill. The supply of some resources cannot, of course, be maintained for ever, as in the case of coal, the formation of which is beyond human power. But our forest resources, our fisheries and the fertility of our agricultural areas must be preserved. That such has not been done in the past is indicated by the fact that the older wheat-growing districts of the West must now be used for mixed farming, some of our fisheries have declined greatly in value and good lumber has increased enormously in price.

The protection of these resources assumes a consideration of the future, too distant to permit of the problem being handled in the ordinary political field. The connection between ordinary government departments and the demands of the public is too close to allow them to handle the problem. It is for this reason that conservation can be best carried on by a body such as the Commission of Conservation in Canada, which was established for the purpose.—The Monetary Times.

Australia May Have to Import Wheat

Owing to the bad season, there is fear that Australia may have to import wheat in 1921, says a despatch to the London Times from Sydney, N.S. W. The wheat board recently asked Great Britain to forego the balance of 1,500,000 tons owing her, but she refused.

It is still hoped, says the despatch, that Great Britain will defer requiring the shipment of this wheat until the visible supply in Australia is assured.

Blessings of poverty may look good to the millionaire.

In English law there is no definition of an accident.

Germany Unrepentant

Bishop Cannon, After Visit, Says The Peace Treaty Should be Enforced

In a long letter to the London Times, Bishop James Cannon, junior, states that during the last month he has visited Germany and other continental countries, and has arrived at the following conclusions:

First, Germany has sinned. Second the world suffers. Germany's sin has brought great suffering. Third, Germany is unrepentant. Fourth, Germany must pay. Fifth, the peace treaty should be rigidly enforced. A repentant Germany is greatly to be desired, but if not a repentant Germany, a submissive, obedient, de-Prussianized Germany is necessary for the peace of the world.

She Thought Dress Would Look Dyed

But "Diamond Dyes" Turned Her Faded, Old Shabby Apparel Into New

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers' draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

High Price For Farm Land

One hundred dollars per acre was paid for 640 acres of land west of Nobleford, Alberta, in a high state of cultivation but not otherwise improved. This is one of the highest prices paid for a block of non-irrigated land in this sector.

On the Upper Congo no negro lives beyond 40, that being the age at which his fellow-men directly or indirectly cause his death.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Preserve Farm Property

No matter how substantial a building is, the elements will damage it if given a chance. Unless the surface is protected by a surface coating, wear and the elements will work away at it constantly. Barns weaken and partially collapse, silos decay, pens and coops go to pieces and are split up for firewood—all of which happens long before the building's time.

There are millions invested in farm buildings in this country. There are also many millions of dollars worth of farm machinery. Both property and implements can be indefinitely conserved by paint and varnish at a cost amounting to only a fraction of the loss which otherwise occurs.

Frankness makes people disagreeable, but not all disagreeable people are frank.

MURINE FOR YOUR EYES — **Rests, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tire, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Druggists in Canada. Write for Free Eye Book. Murine Company, Chicago, U. S. A.**

U.S. Sentiment Changes

Low Priced Land in Western Canada Is Attracting American Settlers

Sentiment in the United States, which for a long period was apathetic and even adverse, so far as Manitoba and other western Canadian farm lands were concerned, has undergone a complete change in favor of the purchasing of tracts on this side of the border. This is the report that was brought back from Chicago, Ill., by L. Asenault, president of the Arsenault agencies, limited, who has just returned from a southren business trip.

Much of the credit for this change in public opinion is due to De Witt Foster, superintendent of resources for the Canadian National Railways, Mr. Arsenault said. Mr. Foster has done great campaign work in various states and has succeeded in convincing landseekers that land can be purchased in western Canada for $25 per acre equal to that for which they are obliged to pay $400 per acre in their own states.

This advertising of Western Canadian lands has interested men in Illinois, Indiana, Iowa, Texas, Minnesota and North and South Dakota, and present indications point to a record year in immigration from the south. These men all have plenty of money, and much American capital will be invested in western Canadian lands.—Winnipeg Free Press.

Minard's Liniment Co., Limited.

Dear Sirs,—Your MINARD'S LINIMENT is our remedy for sore throat colds and all ordinary ailments.

It never fails to relieve promptly.

Canada Pulp Supplies

British Interests Securing Pulp Wood Limits Here

G. R. Hall Caine, son of Hall Caine the novelist, was recently in Ottawa. In the course of an interview Mr. Caine said that he was negotiating for the purchase of pulp wood limits and pulp, the company he represents being prepared to spend $40,000,000 in the enterprise. Mr. Caine, who is himself a director of several English paper mill companies, and a pulp and power company in Canada, is representing seven of the largest newspaper publishers in England whose object in securing pulp wood limits is to insure for their paper a continuous supply of newsprint. Negotiations are under way for the purchase of 1,000 square miles of limits. Incidentally Mr. Caine expressed the opinion that there would be a great influx of English capital to Canada in the next few years. The eyes of English business men were turning toward Canada at the present moment as never before.

More men would marry only for love if they could afford it.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin,—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

The Beauty of The Lily can be yours. Its wonderfully pure, soft, pearly white appearance, free from all blemishes, will be comparable to the perfect beauty of your skin and complexion if you will use

During the month of March, 99 new companies were incorporated in B.C. Four were fishery companies; 7 agricultural; 9 mining and 22 lumbering. The remainder were composed of oil exploration, brokers, importers and retail business establishments.

Miss Flora Boyko Tells How Cuticura Healed Her Pimples

"My face was very itchy at first, and after that it was covered with pimples that disfigured it badly. The pimples were hard and red and they were small, and they were scattered all over my face and were so itchy I had to scratch and I could not sleep.

"These bothered me nearly a year before I used Cuticura Soap and Ointment and when I had used five cakes of Cuticura Soap and five boxes of Cuticura Ointment I was healed." (Signed) Miss Flora M. Boyko, Gardenton, Man., Dec. 26, 1918.

Having obtained a clear healthy skin by the use of Cuticura, keep it clear by using the Soap for all toilet purposes, assisted by touches of Ointment as needed. Do not fail to. Include the exquisitely scented Cuticura Talcum in your toilet preparations. Splendid after bathing.

For free sample each of Cuticura Soap, Ointment and Talcum address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

Board Estimates The Value of Wheat Certificates

Winnipeg.— James Stewart, chairman of the Canadian wheat board, announces that the value of the "participation certificates" will not be less than 40 cents per bushel.

The official statement of the board reads as follows:

The Canadian wheat board feels that some idea should be given as to the probable value of the participation certificates issued by the board. The wheat has not all been marketed by the farmers, and it is indeed difficult to estimate closely the quantity remaining in their hands to be marketed before the new crop. Other factors enter into the situation, such as the values prevailing when and as the wheat is marketed, as well as the quantity required for domestic use before the new crop, a late harvest making a difference of several million bushels.

Notwithstanding this, the board estimates that it should be able to pay at least 40 cents per bushel against the wheat represented by the participation certificates.

At the conclusion of the present season complete returns of the year's operations will be made known, and a final report as to the full value of the participation certificates will be issued.

Registration in Manitoba

To Register For Next Fall Vote On Dry Province

Winnipeg. — Registration for the coming provincial general election, it is officially announced, will begin in Winnipeg at 143 polling divisions on May 10 and extend over the next two days. But it is not registration for this election alone. Some time in the late summer or early fall the people of Manitoba will be given an opportunity of saying whether they want a bone dry province or not. Those who register will have the opportunity of expressing their views by the ballot. Those who do not will not have this right.

Price for 1920 Crop

Ottawa.— It is freely predicted in authoritative quarters that the price of the 1920 crop will be higher, some members believing that it will go to $3.00 per bushel, provided there are no internal troubles in any of the larger countries of the world.

Continuance of the wheat board is still looked for, in view of the fact that Europeans governments have practically decided to stand together.

Hun Delegation Reaches London

London. — A German delegation, headed by Dr. Zeelinger, has arrived in London to settle with the maritime section of the reparations committee the questions of the remaining ships to be handed over to the allies.

LET "DANDERINE" BEAUTIFY HAIR

Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic, then its life, color, brightness and abundance will return—Hurry!

All Want Representation

Other Dominions May Ask For Privilege of Individual Ambassador

Montreal.—A London cable to the Montreal star says: "If Canada is permitted to establish an individual diplomatic representative in Washington, three other great British colonies may be expected to ask for the same privilege. This is the personal opinion of several members of the foreign office staff. The dominions referred to are New Zealand, South Africa and Australia. These officials take the view that the Dominions should be accorded the fullest freedom in conducting their international tariff, customs, boundaries and immigration affairs. The only matters which should be strictly reserved for the British ambassador are those pertaining to the foreign policy of the empire as a whole, they believe.

Wilson Is Criticized

No Excuse at All For Prolongation, Of War, Says Senator Knox

Washington.— Opening the debate on his resolution to declare the state of war with Germany and Austria at an end, Senator Knox, Republican, of Pennsylvania, declared in the senate that President Wilson was arbitrarily maintaining that the U.S. technically was at war in order to coerce the senate into ratification of the Treaty of Versailles.

"There was no excuse whatsoever for greatly prolonging the war beyond the signature of the armistice," Senator Knox said, "and the only explanation for so doing was the deliberate aim to retain all those autocratic compulsory powers, with which the executive had been endowed for the prosecution of the war, in order that they might be used for other purposes."

Declaring that he entertained only sympathy for the president in his illness and "sympathy for the country which must suffer under him because of it," Senator Knox said it was an unwelcome task to judge one who has fallen in public esteem." The Senator then launched into a severe criticism of the president for his "stand pat attitude" in regard to the treaty.

Strangled Girl At Own Request

Alleged Confession is Placed As Evidence in Trial on Charge Of Murder

Pontiac, Mich.—The state has closed its case in the trial of Anzon Best, charged with the murder of Miss Vera Schneider, and a few character witnesses were examined for the defence. Best, it was said, would probably take the stand in his own behalf.

After the introduction of an alleged confession over the objection of defence counsel, newspaper men who interviewed Best related the prisoners' alleged statements that he had strangled the telephone operator at her own request.

County officers placed on the stand declared they had not used force in obtaining the alleged confession, as claimed by Best when he repudiated the statement attributed to him by Prosecutor Gillespie.

Further Advance in Paper Prices

Washington.—Further advances in print paper prices are to be made by the International Paper company on July 1, said a telegram from Chester W. Lyman, vice-president of the company, which was presented to the senate committee now investigating the paper shortage. The message was addressed to Joseph Pulitzer, Jr., publisher of the St. Louis Post-Despatch.

Hindenburg's Statue is Confiscated

Berlin.— The colossal Hindenburg war statue, standing in front of the Reichstag, has been confiscated by the police. This action was taken in order to prevent the possibility of disorders in the event of its being moved from Germany.

Permanent Board To Buy Supplies

Business Interests Throughout Country Send Resolutions to Government

Ottawa.—Communications from the business interests throughout the country have been received by the government favoring the bill to establish a permanent board for the purchase of governmental and other supplies. Resolutions in approval have been received from the boards of trade of Vancouver, Calgary, Moose Jaw, Medicine Hat, Saskatoon and Winnipeg, the associated boards of trade of British Columbia and the Canadian Manufacturers' Association. The point generally taken in the question is that the establishment of such a board would mean greater economy in the purchase of supplies and give every man engaged in the business a fair chance to compete.

Ontario Liquor Laws

Board of License Commissioners Is Given Greater Measure of Control

Toronto.—Amendments to the Ontario Temperance act introduced by Hon. N. C. Nixon in the legislature reduces the minimum penalty to be imposed on persons having liquor illegally in their possession from $200 to $100. The maximum penalty that may be imposed under the act is increased, however, from $1,000 to $2,000. Either a fine or imprisonment may be imposed at the magistrates' discretion.

The board of license commissioners is given a greater measure of control over the number of prescriptions issued by physicians by being empowered to refuse to honor prescriptions issued too promiscuously. The allowance of liquor to dentists for medicinal purposes is increased from six ounces to one quart.

A person convicted of a breach of the Ontario Temperance Act will be forbidden to have liquor in his home, even if he move from the house in which the liquor was kept. This prohibition remains in force for a year following the conviction.

Persons convicted of being drunk or disorderly twice within three months may be committed to jail or to an industrial farm for a period of not more than three months.

Certain of ships on lakes or rivers within the province are made responsible for infractions of the act which may occur on their vessels.

Imprisonment without the option of a fine, is made the penalty for persons who are intoxicated while in charge of a motor car under a bill introduced by Hon. W. E. Raney. Dr. Stevenson of London, sugested confiscation of automobiles while the owners were in prison.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."

North Schleswig Becomes Part of Danish Territory

Copenhagen.— Danish troops have occupied Northern Schleswig, the people of which on February 10 last, in a plebiscite provided for in the peace treaty, voted by a large majority for a return of this part of the territory to Danish nationality.

The Germans had been in control there since 1866. Enthusiastic scenes accompanied the arrival of the Danes at Sonderburg. There the entire population, among them a number of aged persons, who still remembered the rain of German shells on the town 56 years ago, and about 50 veterans of the war of 1864 were out to cheer them.

A force of Danes also arrived in Hadersleb (Hadersleven) and were welcomed by a crowd estimated to aggregate 20,000. Danish and French troops marched through beflagged streets to the barracks, where, amid great rejoicing, the German colors were hauled down and the Danish flag was hoisted. At Tondern, British troops were drawn up to receive the Danes.

Admiral Sheppard, commander of the allied occupation forces, will officially transfer the military authority to the Danish commander at Sonderburg.

In the war of 1864, Prussia and Austria wrested the duchies of Schleswig and Holstein from Denmark. Two year's later Prussia's victory over Austria resulted in the incorporation of the duchies in the dominions of Prussia with the provision that the people ultimately should decide their nationality by plebiscite. This agreement never was kept by Prussia and was repudiated by her on the formation of the German Empire in 1871.

Forced to Economize

Former Kaiser's Whole Stable is up For Auction

The Hague.—Horses, carriages and harness belonging to the former German emperor, including a set of gold mounted harness presented to him by the Pope, are offered for sale in a display advertisement in the Handelsblad. The advertisement is signed only with a number, but it is agreed to furnish photographs and other information. So far as the Associated Press is able to learn, no doubt exists that it is Count Hohenzollern himself who is disposing of the goods. For some time past rumor at Amerongen has had it that the former emperor's financial condition has not been thriving.

Best Medicine He Has Ever Taken

FATHER TELLS OF SON'S HELP FROM DODD'S MEDICINES

He Recommends Everybody Who Has Shaking or Pain in the Heart To Use Dodd's Dyspepsia Tablets and Dodd's Kidney Pills.

Birmingham, Sask., May 10th. — (Special).—"Dodd's Kidney Pills and Dodd's Dyspepsia Tablets are the best medicines my son has ever taken."

This is the statement of Mr. Johannes Reinson, a well-known resident here. "When he started to take them," Mr. Reinson continues, "there was not much hope of him. Soon after starting to take the Dodd's Medicines he began to improve in health and now he is well."

He advises everybody who has shaking or pain in the heart to use Dodd's Kidney Pills and Dodd's Dyspepsia Tablets.

The Dodd's Medicines act on the two essentials to good health. The Tablets help to digest the food and produce good blood. The Pills act on the kidneys, healing and strengthening them, thus ensuring that the blood is kept free from impurities. For the work of healthy kidneys is to strain all impurities out of the blood.

Ask your neighbors if Dodd's Kidney Pills do not heal and strengthen the kidneys.

British Trade Improving

Unemployment is Less Now Than in Any Period Before The War

London.—Sir Robert Horne, president of the board of trade, speaking at a dinner of the London chamber of commerce, said that the present state of British trade showed that the nation could go forward with the greatest confidence. Unemployment, he said, was today lower than at any period before the war, although about eight hundred thousand more people were now engaged in industry. About 85 percent of the returned soldiers had now been absorbed in industry.

Among the guests were Sir George Perley, Canadian high commissioner and Sir Lomer Gouin, premier of Quebec.

To Repatriate Huns

Two Hundred Thousand Prisoners in Russia Said to be in Terrible Condition

Washington.— Dr. Fridtof Nansen, the Norwegian explorer, probably will head the organization to be set up by the League of Nations for the purpose of repatriating 200,000 German, Austrian and other war prisoners still held in Russia. Reports to be submitted to the league council at Rome this month say that unless these men are rescued from their prison camps in Siberia before next winter few of them are likely to survive. They have been in captivity for five years.

Votes for Women

Cape Town, Union of South Africa. —The house of assembly has passed a resolution favoring the extension of the parliamentary franchise to women.

Canadians at Labor Conference

Meeting to be Held in Genoa on June 15 Under Auspices of the League of Nations

Ottawa.—Canada will be represented at the second International Labor conference called under the auspices of the League of Nations. The conference is due to open in Genoa, Italy, on June 15. The Canadian delegates will be: Government, Sir George Perley, high commissioner in London; C. J. Desbarates, deputy minister of naval service. Employers': Thos. Robb, Montreal, Shipping Federation of Canada., Workers: G. J. Gauthier, Montreal; seamens' union.

The conference has been specially called to deal with labor questions affecting seamen.

Volcano Eruption

New York.—Indications that a volcano eruption is taking place on the Island of Providence, belonging to Columbia, and 120 miles off the coast of the Carribean sea, were reported today by the United Fruit Company steamer Calamares.

Keep Your Automobile Like New

You Need

BEECHAM'S PILLS

The digestion of food entails the production of poisons that must be eliminated regularly and thoroughly.

Largest Sale of Any Medicine in the World. Worth a Guinea a box.

Sold everywhere in Canada. In boxes 25c., 50c.

Trucks in Western Provinces

Value of the Truck in Hauling Grain To Market

In the western provinces of Canada the farmers are all future truck-buyers. Many of these farmers are situated at from ten to sixty miles from railroads. The estimated cost for hauling grain is .03 per bushel per mile.

A good team of horses will haul 75 bushels at a speed of 2½ miles per hour.

A two-ton truck will haul 80 bushels on a 20-mile trip in two hours and return in two hours, making two trips per day over good roads!

At a recent meeting of the Grain Growers in Saskatoon, when this fact was pointed out to them, many got busy with pencil and paper and soon figured out where they could save the price of a truck in one season.

Minard's Liniment used by Physicians

New Alberta Bank

Application is being made for the incorporation of the "Bank of Alberta" with headquarters at Edmonton. A capital of $2,000,000 is proposed largely to be subscribed to by the farmers of the province, and branches will immediately be opened at Edmonton and at Calgary.

Applied After Shaving

Keeps the Skin Soft and Smooth

MANY men suffer from irritation of the skin as a result of shaving. With some it assumes a form of eczema and becomes most annoying and unsightly.

By applying a little of Dr. Chase's Ointment after shaving the irritation is overcome and such ailments as Barber's Itch and Eczema are cured.

60 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Ointment

Wonders of Wireless

But Mars Declines to Talk to This Planet

The message from Mars, for which Dr. Frederick H. Millener, noted scientist in wireless, searched inter-stellar space from his giant receiving plant near Omaha, Nebraska, did not materialize. If there were such a message passing through the ether for the fifty millions of miles which separates the earth and Mars it did not come sufficiently close to the earth to be picked up by the great receiving station which Dr. Millener has established on the banks of the Platte River.

For nine hours Dr. Millener and his assistant, L. H. Gamor, searched space for the signals which Mars is thought to be sending earthward.

The first half of the night the wireless instruments were badly interfered with by static. Through the delicate receiving instruments came the cracking of lightning and other electric sounds to such an extent that no signals anywhere could be received.

The receiver was gradually tuned to its full length of wave. Starting at a short wave, its capacity was gradually increased. As its radius was extended the world's wireless business was picked up.

First a school station in Kansas was talking. Next Hawaii was picked up, sending to San Francisco. Then Berlin was heard calling the city of Mexico. Again a station on the coast of Venezuela sent a message to Madrid, then Valpraiso talked with London.

Through and past all these zones, Dr. Millener tuned his receiver until all sounds had ceased. He was in the infinite. Back and forth his apparatus flashed, his range length receiver running the gamut from 16,000 to 300,000 and more. But not a sound came over the waves after the earth zone was past.

The scientists kept this up until daylight. Then Dr. Millener issued the following bulletin:

"The early part of the evening we were troubled with heavy static, so that it was impossible to hear anything except station in South America, Europe and the United States. During the latter hours of the night, when the wireless was stretched to its fullest extent to hear inter-planetary communication, we heard nothing that could be construed as a message from Mars."

Bulletin on Bee-Keeping

Published by the Manitoba Department of Agriculture

At present a great many people in Western Canada are enquiring as to where they can purchase bees, declaring their desire to take up the bee-keeping industry. To assist all such, and also all others who may be interested, the Manitoba Department of Agriculture has published a new 24-page illustrated bulletin entitled "Bee-keeping in Manitoba." This bulletin is written R. M. Muckle, B.S.A., special lecturer in beekeeping, who has had many years experience in bee-keeping in Manitoba, and has had a wide opportunity, in connection with his departmental activities, of observing the beekeeping possibilities of all parts of the province. A free copy of the bulletin may be had on application to the Publications Branch, Manitoba Department of Agriculture, Winnipeg.

Survey of Physicians

In a survey prepared by the Faculty of Medicine of the University of Toronto, in connection with the prospective gift of $5,000,000 from the Rockefeller Foundation for Medical Research in Canada, it is shown that Toronto has one doctor to 567 of population; London, Ont., one doctor to 711; Hamilton, Ont., one doctor to 790, and Ottawa, Ont., one doctor to 840. Ontario leads in the roll call of provinces with one doctor to 766 of population. British Columbia comes next with one doctor to 905, Nova Scotia is third with one doctor to 1,098, and Manitoba, fourth, with one doctor to 1,146.

Keep Minard's Liniment in the House

In Thibet the people salute their superiors by taking off their hats and thrusting out their tongues three times.

Western Horses for Ontario

The undersized horses of the Alberta ranches find a ready market in Ontario, according to the manager of the horse department of the Union Stock Yards, Toronto, who is looking into the supply of this type of animal in the west. The horse of under 1,200 pounds, so common on the range here, and of late years found undesirable from a breeding standpoint is eagerly picked up in the eastern province, he states.

Seager Wheeler is Honored

Queen's University has conferred the honorary degree of Doctor of Divinity on Rev. C. S. Young, of Saskatoon, and the degree of Doctor of Laws on Seager Wheeler, Rosthern, Sask.

DELICATE GIRLS MADE STRONG

Rich, Red Blood Needed to Keep Up Their Vitality

If growing girls are to become well developed, healthy women, their blood supply must be carefully watched. Mothers should not ignore their unsettled moods or the various troubles that tell of aproaching womanhood. It should be constantly borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep and regular open-air exercise. But a lack of appetite, and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer she must have new, rich, red blood and nothing meets a case of this kind so well as Dr. Williams Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus promptly restoring health and strength and transforming anaemic girls and women into cheerful, happy people. Among the thousands who have obtained new health and strength through the use of Dr. Williams Pink Pills is Miss Violet Booth, Glenarm, Ont., who says: — "For a long time I was in a badly run-down condition. I was pale, breathless at the least exertion, and could hardly do any housework without stopping to rest. I often had severe headaches, and my appetite was poor and fickle, and I would get up in the morning without feeling the least bit rested. I had tried several medicines, but did not get benefit from anything until I began the use of Dr. Williams Pink Pills. When I had taken two boxes I could see an improvement, and after using six boxes I found my health fully restored. I feel altogether different since I used the pills that I strongly advise them for all weak, run down people."

If you are weak or ailing in any way, avail yourself at once of the splendid home treatment which Dr. Williams Pink Pills so easily afford, and you will be among those who rejoice in regained health. These pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box or six boxes for $2.50 by writing The Dr. Williams Medicine Co., Brockville.

Settlers in B. C.

Hundreds of settlers are expected to enter the Nechacko Valley in the spring, and it is reported that many concerns controlling thousands of acres in the section have pooled their interests. They expect to have many acres under crop next season.

CHILDLESS WOMEN

Please Read This Letter And See What Normal Health Will Do For You.

Berwick, Ont.—"I had organic trouble, and after taking Lydia E. Pinkham's Vegetable Compound and Blood Medicine all my troubles passed away. I was made strong and well and have been ever since. Now we have a fine baby boy six months old, and I know that I would not have this baby and would still be suffering if it had not been for your remedies. My husband and myself say that your remedies are worth their weight in gold, and I recommend them to my friends. One of my aunts is taking them now."—Mrs. NAPOLEON LAVIGNE, Berwick, Ontario, Canada.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is its ability to correct sterility in many cases. This fact is well established as evidenced by the above letter and hundreds of others we have published in these columns.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

SPOHN'S DISTEMPER COMPOUND

COLT DISTEMPER

You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin the treatment. No matter how young, SPOHN'S DISTEMPER COMPOUND is safe to use on any colt. It is wonderful how it prevents all distempers, no matter how colts or horses at any age are "exposed."

SPOHN MEDICAL COMPANY, Goshen, Ind., U.S.A.

Lake Windermere Camp

New Resort to be Opened on Shores Of Lovely Lake In Rockies

There will be opened to tourists this summer, a new resort of rustic design in the Canadian Pacific Rockies on the sandy beaches of Lake Windermere, the loveliest warm water mountain lake in British Columbia.

Lake Windermere is situated about 170 miles south of the main line of the Canadian Pacific and is reached from the main line at Golden, the station being Lake Windmere.

The scenery of this region, combining as it does pastoral softness with rugged mountain grandeur, will attract visitors from all parts, and become a favorite playground.

The summer visitor will find here everything that he could wish, bathing, boating, riding on mountain ponies to great Canyons and Glaciers, golf, automobiling, fishing and big game hunting in season.

The Canadian Pacific are erecting a number of cabins fully equipped with the conveniences of the modern home, which will be opened July 1st. Community hall for dancing and social recreation.

—An auto road from Banff is in the course of construction by the Dominion Parks Board.

How's This?

We offer $100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System.

Sold by druggists for over forty years. Price 75c. Testimonials free.

F. J. Cheney & Co., Toledo, Ohio.

Cold-Proof House

House Has Been Built to Keep the Cold Out and the Heat in

A house has been built in Saskatoon on the refrigerator plan, save that whereas a refrigerator keeps the cold in, the house has been built to keep the cold out and the heat in. It has been so successful during the last winter that it may be said to merit the term "cold-proof." The owner is Mr. H. Gauvin, a refrigerator engineer.

The house was built of cement and care was taken that there should be no means whereby the warm air in the house might travel up the walls, and escape through a crack or down the inner surface of the outer wall, and so lose its heat. To this end the walls were so built as to eliminate air pockets of appreciable size. The house had a concrete basement, and here again the builder took care that the cold air would not leak into the house.

It must not be thought that the house was hermetically sealed, for it has 43 windows to the nine rooms. But there are only two entrances, one in the front and one in the rear. During the winter the house was heated throughout by electricity, without undue expense.

New Gold Discovery

Gold has been discovered on Snake Creek, eight miles north of Okotoks, and 20 miles south of Calgary. Prospectors have been flocking to this locality, and many miles of claims have been staked. A sample analysed by the Calgary city chemist assayed $18.50 to the cubic yard of sand.

The North Sea takes the drainage of a quarter of Continental Europe besides that of half of the British Isles.

Farm Women's Institutes

The Alberta farm womens' institutes are now the second largest in the Dominion, with a membership of more than 13,000. During the year 1919, 32 branches were organized in the province making a total of 265. Activities include classes in cooking, sewing, socialogy, child welfare and the undertaking of relief work.

"Gosh! How my back aches!"

After Grip, "flu" or colds, the kidneys and bladder are often affected—called nephritis, or inflammation of kidneys.

This is the red flag of danger—better be wise and check the further inroads of kidney disease by obtaining that wonderful discovery of Dr. Pierce's, known as Anuric (anti-uric-acid), because it expels the uric acid poison from the body and removes those pains, such as backache, rheumatism in muscles and joints.

Naturally when the kidneys are deranged the blood is filled with poisonous waste matter, which settles in the feet, ankles and wrists, or under the eyes in bag-like formations.

Send 10c. for trial pkg. of Anuric to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., or branch Laboratory, Bridgeburg, Ont.

PRESTON, ONT.—"I was troubled with rheumatism in the right limb and hand for several years, and lately in the left shoulder. The only way I could lie was on my back. I had great difficulty to sit down and more to get up. Recently I had a very severe pain in my back. I have taken Dr. Pierce's Golden Medical Discovery several times with the most satisfactory results, so I concluded to give his Anuric Tablets a trial. The pain in limb and shoulder has stopped entirely and in right hand it is very slight and getting less all the time. I can now sit or lie in any position I wish without discomfort or pain. I certainly will recommend Anuric; there is nothing nearly so good; I have tried them all."—Geobel Bros. cor. Duke and Waterloo.

Get Full Plow Value Behind Your Tractor

No matter how good your tractor may be, you have to depend upon the plow behind the tractor for the important direct work of seed bed-making.

It pays to be especially careful in choosing your tractor plow.

We offer you the opportunity to get a John Deere Tractor Plow—the plow that has more than 80 years of successful plow-making experience behind it.

If you will come in and investigate this plow we are sure you will agree with us that it is the best tractor plow for you to buy—that it will last longer than any other tractor plow and will give you better results while you are using it.

Especially, we would like to have you investigate these important features:

How the genuine John Deere bottoms are particularly adapted for thorough seed bed-making and longer service.

Why the John Deere Quick Detachable Shares save time and labor and *stay close fitting.*

How the simple, dependable power lift device, that raises the bottoms high and level, works without troublesome chains or sprockets.

How the bottoms reach full plowing depth immediately when lowered and are locked down to this depth while plowing.

How the unusual clearance assures steady work in trashy land.

How the simple, strong construction throughout assures maximum length of service and minimum repair costs.

How the hitch adapts it for successful use with any tractor.

We can furnish this plow in two, three and four-bottom sizes.

Remember, you need the best tractor plow you can get.

Come in and see our John Deere Tractor Plow

ALERT ALTARIO

On Friday last the whole town of young folks assembled to do honour to Miss Muriel Mundy and Mr. George McLeod the next couple on the matrimonial list. The A. W. I. had arranged a Kitchen shower for the bride-elect at the home of Dr. and Mrs. J. D. Robinson. A large galvanised bath tub was crammed with useful artitles of every discription each accompanied by good wishes in verse. Muriel and George expressed their appreciation in graceful little speeches, and the company gave them a rousing cheer after the singing of Jolly Good Fellows. Novelty contests and games followed and the party broke up after supper at having spent a really delightful time.

Mothers Day was quite an event in town. Thanks to the thoughtfulness of our teacher the school was beautifully decorated with flowers. The Girls Club presented each Mother with a pink carnation other floral offerings were sent by Margaret Conquest Govt. House Regina and the whole Sunday School was en fete in honour of Motherhood. The choir rendered some fine anthems—the soloists doing good work—they were Miss Speers, Miss Inkster and George Conquest.

The W. I. meeting was fairly well attended at Mrs. Rexer home and everyone enjoyed the papers on gardening and cutting of meats one given by the hostess and the other by Mrs. Townsend. A summer picnic was planned for June by the latter.

On May 22nd Saturday evening it is hoped a large crowd will gather to here the illustrated lecture entitled Red Cross in Peace and War. There are 66 slides on that subject which is dear to the heart of everyone. A social hour will follow when the Hospital nurses will be the guests of honour. Everyone come.

The sloughs were never so full of water as this year, and on Sunday afternoon the young bloods cooled off in the sparkling water for an hour—oh boys it was a grand and glorious feeling tho the water was a bit cold.
